THIS SIXTH VOLUME IS

A MEMORIAL OF THE MUNIFICENCE OF

THE WORSHIPFUL COMPANY OF GOLDSMITHS

WHO HAVE GENEROUSLY CONTRIBUTED

FIVE THOUSAND POUNDS

TOWARDS ITS PRODUCTION

PREFACE TO VOLUME VI.

THIS volume, of which a large part of the cost of production has been defrayed by the munificence of the Goldsmiths' Company, contains L and M, edited by Henry Bradley, and N, edited by W. A. Craigie. It may be remarked that in several recent Dictionaries the space occupied by the part of the English vocabulary here treated amounts almost exactly to one-tenth of the whole.

For observations on the etymological and other characteristics of the words included in the three divisions of this volume, and for detailed statistics relating to the number of words of various classes, and the number of quotations, the reader is referred to the separate prefaces to L, M, and N. The following recapitulation of some of the figures there given may be found convenient :—

	Main words	Subordinate words.	Special combinations	Obvious combinations.	Total of words.	No. of quotations.
L (528 pages)	7,049	2,669	2,342	2,929	14,989	65,440
M (820 „)	12,988	6,422	2,986	3,636	26,032	99,255
N (277 „)	3,484	2,298	440	1,570	7,792	36,859
	23,521	11,389	5,768	8,135	48,813	201,554

The aggregate numbers for the first six volumes of the Dictionary are as follows :—

Main words.	Subordinate words.	Special combinations.	Obvious combinations.	Total number of words.

PREFACE TO THE LETTER L.

THIS half-volume, containing the words with initial L, includes 7,049 Main words, 2,342 Special Combinations explained and illustrated under these, 2,669 Subordinate entries, and 2,929 Obvious Combinations; in all 14,989 words. Of the Main words, 1,945 are marked † as obsolete, and 330 are marked ‖ as alien or not completely naturalized *.

In the prefatory note to G it was pointed out that the portion of the English vocabulary under that initial letter was characterized by the entire absence of the words with Greek, Latin, French, and English prefixes, which under nearly all the other letters of the alphabet are abundant, and by the unusually large number of words (chiefly of Old English, Scandinavian, or early French origin) expressing notions of extreme generality, which have branched out into a great variety of special senses. The L portion of the vocabulary is also distinguished by both these characteristics, and the consequence is that the L words, like the G words, have in this work a proportionately much larger space than is allotted to them in dictionaries which do not follow the historical method of treatment.

The proportions in which the component linguistic elements of the English language are represented in the words with initial L are probably not far from the average. The native English element has numerically only the second place; but it comes unquestionably first with regard to the importance of the words belonging to it, and the amount of space which they occupy in the Dictionary. Typical examples of the wide and often interesting ramification of meaning characteristic of this oldest portion of the language may be seen under *lady*, *land*, *lay* vb.[1], *let* vb.[1], *lie* vb.[1], *life*, *light* sb., adjs. and vbs., *long* adj., *look*, *lord*, *lose* vb.[1], *lot*, *love* sb.[1], vb.[1], *lust*, *lusty*. The Scandinavian words are perhaps somewhat less numerous than in some other letters, but several of them, as *law*, *leg*, *loft* (whence *lofty*), *loose* adj. and vb., *low* adj., are more than ordinarily frequent in use, and rich in variety of senses and applications. The Romanic and Latin words outnumber those from all other sources together. Many of them, as usual, are of rare occurrence; but the great importance of this element may be seen from such examples as *label*, *labour*, *language*, *large*, *letter*, *liberty*, *library*, *line*, *liquid*, *literature*, *locomotive*, *lodge*—to mention only a few of the most prominent. The Greek derivatives are mainly scientific terms of modern formation; among those of earlier introduction and wider currency are *lexicon*, *lexicography*, *logarithm*, *logic*. The quasi-suffixes *-loger*, *-logian*, *-logic*, *-logical*, *-logue*, *-logy*, representing the terminal elements in certain Greek compounds of λόγος, and in derivatives of these, are so common in English that it has been found convenient to treat them in special articles. From Dutch or Low German we have the important words *luck* and *loiter*, besides several others little used or obsolete. The list of Celtic words is even shorter than usual; whether it should include *loop* sb.[1] is doubtful; the only other L words of Celtic origin that are at all widely known are *loch*[1] (*lough*), *leprechaun*, and *lymphad*. Of words from extra-European languages there are the Hebrew *leviathan*, *Levite*, *log* sb.[2], the Arabic *latic*, *leban*, *lohoch*, the Indian *lac*[1], *lac*[2], *langooty*, *langur*, *lascar*, *lat*, *lathee*, *lingam*, *lodh*, *loot*, *lootie*, *lota*, *lungi*, *lunkah*, the Chinese *langshan*, *li*[1], *li*[2], *liang*, *likin*, *ling* sb.[3], *litchi*, *longan*, *loquat*, the Malay *lanchara*, *lata*, *lorikeet*, *lory*, the African *lamba*, *leche*, *lhiamba*, *limbo*[2], *loa*, *lobola*, and the South American *llama* and *lucuma*.

In a very large number of instances the etymology of words will be found to be more correctly stated or more fully discussed than in any previous English dictionary. Attention may be specially called to the etymological notes on *lad*, *larch*, *lass*, *laudanum*, *lavendar*, *law-abiding*, *lawn* sb[1], *lectern*, *Lenten*, *leprechaun*, *less*, *lewd*, *ligure*, *like* adj., *lobby*, *lobe*, *lobster*, *locomotive*, *lodge*, *lose* vb.[1], *louver*, *lozenge*, *lucern*[1], *lymph*. In the articles on the suffixes *-let*, *-lewe*, *-like*, *-ling*[1], *ling*[2], *-ly*[1], *-ly*[2], the history and functions of these formatives are explained with greater fullness than has been attempted elsewhere.

The material originally collected for the letter L was laboriously and efficiently sub-edited, about twenty-five years ago, by Mr. W. M. Rossetti, whose work was continued by the Rev. C. Y. Potts, of Ledbury. Subsequently the portion from *L* to *Lusus* was taken in hand, for the incorporation of the new quotations, by the late Mr. E. C. Hulme, and that from *Lut-* to the end of the letter by Mr. E. Warner, of Eltham. The work of these gentlemen was completed in 1885–6, since which time a large mass of additional material has been accumulated.

* The following table illustrates the scale of this work as compared with that of certain other Dictionaries:

	Johnson.	Cassell's 'Encyclopædic' (including Supplement 1902).	'Century' Dict	'Funk's Standard'	Here.
Total words recorded in L	1,286	7,320	7,719	8,017	14,989
Words illustrated by quotations	1,068	2,211	2,503	762	11,469
Number of illustrative quotations	4,017	2,787	6,279	999	65,440

The number of quotations in the L portion of Richardson's Dictionary is 3,321.

PREFACE TO THE LETTER L.

Amongst those who have rendered assistance in the preparation of the articles in this half-volume, especial thanks are due to Prof. Sievers, of Leipzig, M. Paul Meyer, of Paris, Prof. Napier, of Oxford, Prof. Kluge, of Freiburg-im-Breisgau, and Prof. Morsbach, of Gottingen, for help in the treatment of etymological questions; to Mr. James Platt, jun., for information relating to the origin and history of words from American and other little-known languages; to Dr. W. Besant, of Cambridge, and Prof. Love, of Oxford, for help with terms of mathematical and physical science; to Prof. J. K. Laughton, for much information on the nautical uses of words; to Prof. J. Cook Wilson, of Oxford, for important suggestions relating to the article *Logic*; and to Sir Howard Elphinstone, Bart, and Sir W. R. Anson, Bart., M.P., for information on the legal sense of *Lien*. The verification, in the British Museum Library, of references to books not accessible at Oxford has been done, at no small cost of time and labour, by Mr. E. L. Brandreth. Mr. R. J. Whitwell, of Oxford, has frequently rendered help of various kinds. Dr. Furnivall's multifarious services to the Dictionary have been no less abundant than in the former volumes.

The proofs have been regularly read, and many valuable suggestions furnished, by Lord Aldenham, the Rev. Canon Fowler, of Durham, Dr. W. Sykes, F.S.A., of Exeter, Mr. W. H. Stevenson, M.A., the Rev. Prof. Skeat, the Rev. W. B. R. Wilson, of Dollar, Mr. A. Caland, of Wageningen, Holland, and latterly by Mr. H. Chichester Hart, who has supplied many important additional quotations. The first 64 pages had the advantage of being read in proof by the late Dr. Fitzedward Hall, whose invaluable services have been acknowledged in all the foregoing instalments of the work.

The assistants who have worked with me in the preparation of this half-volume are Mr. G. F. H. Sykes, B.A, Mr. Walter Worrall, B.A., Mr. C. T. Onions, M.A., Mr. W. J. Lewis, Mr. H. J. Bayliss, Miss E. S. Bradley, and (in the later portions) Mr. James Dallas.

-lock, *suffix,* in mod. Eng. occurring only in *wedlock,* represents OF. *-lâc,* the second element of numerous compounds (usually neuter: rarely masc.) in which the first element is a sb. OE. had about a dozen of these compounds (those in which *-lâc* means 'offering', LAKE *sb.*[1], are not counted); in all these the second element may be rendered 'actions or proceedings, practice', as *brýdlâc* nuptials, *beadolâc, þeohtlâc, heaðolâc,* warfare, *hémedlâc, wyflâc,* carnal intercourse, *reaflâc* robbery, *wedlâc* pledge-giving, also espousals, nuptials, *witeläc* punishment, *wrôhtlâc* calumny The *-lâc* of these compounds should probably be identified with *lâc* play, sport, LAKE *sb.*[2]; the words meaning 'warfare', which may have been the earliest examples of this use, may be compared with the synonymous compounds in *-plega* play. Of the OE. compounds of *lâc* three (*brýdlâc, þeohtlâc, réaflâc*) survived into early ME., and *wedlâc* still survives with altered meaning. In ME. the suffix was sometimes assimilated in form to the etymologically equivalent but functionally distinct Scandinavian -LAIK. A few examples, not recorded in OE, appear in early ME: *dweomerlak* (DEMERLAYKE), FERLAC, SCHENDLAC, TREWLAC, WOHLAC (the last from a vb.-stem, *woȝ-* to woo), but none of these survived later than the 14th century.

Long standing. The origin of this phrase seems to be illustrated by the following passage —*a* 1568 ASCHAM *Scholem.* I. (Arb.) 34 Except a very fewe, to whom peraduenture blood and happie parentage, may perchance purchase a long standing vpon the stage.

Look, *v.* The synonymous MDu. *loeken* should have been cited as cognate.

Loot, *sb.*[1] See LUTE *sb.*[3], which is etymologically identical.

L.

L (el), the twelfth letter of the modern and the eleventh of the ancient Roman alphabet, represents historically the Gr *lambda* and ultimately the Semitic *lamed*. The earliest known Semitic forms of the character are 𐤋 and 𐡋; both these occur in early Greek inscriptions; the latter was adopted from the Greek into the Latin alphabet, and is the ancestor of the modern Roman forms, but in Greece itself was superseded by the inverted form ⅂, which eventually became Λ

The sound normally expressed by the letter is the 'point-side' consonant, i.e. a sound produced by the emission of breath at the sides, or one side, of the oral passage when it is partially closed by contact of the 'point' of the tongue with the gums or palate.

In phonetic treatises *l* is used as a general name for consonants produced by lateral emission of breath, whether the stoppage is produced (as above) by the 'point', or by some other part of the tongue, thus we speak of a 'guttural *l*' and a 'palatal *l*' as occurring in various foreign languages

The 'point-side' consonant admits of considerable diversity in mode of articulation and consequently in acoustic quality The Eng *l* differs from that of Fr and Ger in being uttered with the 'front' of the tongue more concave; hence its sound is 'duller' or 'thicker' Its precise place of articulation varies according to the nature of the adjacent sounds In Eng it is normally voiced, an unvoiced *l* occurring only as a 'glide' connecting the voiced *l* with a preceding or following unvoiced consonant Like *r* and the nasals, *l* may be used as a sonant or vowel (in the phonetic notation of this Dictionary indicated by 'l), but this occurs only in unstressed syllables, as in *little* (li t'l), *buckled* (bʊ k'ld).

The mod Eng. *l* represents not only the OE. *l*, but the OE *hl* (early ME *lh*) and *wl*.

In certain combinations an original *l* has regularly become silent, after having modified the sound of the preceding vowel In most of these cases the *l* is still written, and serves to indicate the pronunciation of the preceding vowel The following combinations of letters (when occurring in the same syllable, or in derivatives of words in which they were tautosyllabic) may be regarded as compound phonetic symbols of almost unvarying value: *alf* (ɑ̄f), *alve* (ɑ̄v), *alm* (ɑ̄m), *alk, aulk* (ɔ̄k), *aulm* (ɔm), *oll* (ōl). In many dialects, esp in Sc, the instances in which an original *l* regularly disappears are much more numerous than in standard Eng; cf Sc *awfu', fou, ca'*, etc., in Sc. the regular representative of *ol(l* is *ow*, as in *fowk, pow*.

Lad (læd), *sb.*¹ Forms: 4–6 **ladde**, 6–8 *Sc.* **lawd**, 7 **ladd**, 5– **lad** [ME *ladde*, of obscure origin

Possibly a use of the definite form of the pa. pple of LEAD *v.*, in ME. *lad* is a dialectal variant of *led* pa pple The use might have originated in the application of the plural *ladde* elliptically to the followers of a lord Actual evidence, however, is wanting It is noteworthy that a 'Godric *Ladda*' attests a document written 1088–1123 (Earle *Land Charters* 270) If this cognomen be (as is possible) identical with ME *ladde*, its evidence is unfavourable to the derivation suggested above

Quite inadmissible, both on the ground of phonology and meaning, is the current statement that the word is cognate with the last syllable of the Goth *juggalauþs* young man; the ending *-lauþs* (stem *-lauda-* adj., *lauds-* sb), which does not occur as an independent word, has in compounds the sense 'having (a certain) growth or size', as in *hwēlauþs* how great, *swalauþs* so great, *samalauþs* equally great The Celtic derivations commonly alleged are also worthless. The Welsh *llawd* is a dictionary figment invented to explain the feminine '*lodes* (in Dictionaries *llodes*), which Prof Rhys has shown to be shortened from *herlodes*, fem. of *herlawd*, a ME *herlot* HARLOT, and the Irish *lath* does not exist in either the earlier or the later sense of 'lad', but means 'hero' or 'champion']

Like the corresponding masc designation *hlǽford*, LORD, the word is not found outside Eng (the Icel. *lafði* is adopted from ME) The etym above stated is not very plausible with regard to sense, but the attempts to explain *hlǽfdíge* as a deriv of *hlǽford* are unsatisfactory the fem suffix in OE is *-icge*, not *-ige*, and the umlaut in the first syllable is difficult to explain on this supposition.

The OE *æ*, being regularly shortened in ME before two consonants, yielded regularly *ă* and *ĕ* according to dialect. The ME. *lĕfdi*, *lĕvdi*, is represented by Sc *leddy* The other form *lāfdi* (= **lavdi*) became *lāvedi* (3 syllables), and by regular development *lāvedi*, afterwards the *e* became silent and the *v* was dropped, hence the mod Eng. form

The genitive sing (OE *hlǽfdīgan*) became by regular phonetic change in ME coincident in form with the nom., hence certain syntactical combs have the appearance of proper compounds, as *lady-bird*, *Lady day*, *Lady-chapel*.]

4 A woman of superior position in society, or to whom such a position is conventionally or by courtesy attributed Originally, the word connoted a degree equal to that expressed by *lord*, but it was (like its synonyms in all European langs) early widened in application, while the corresponding masc term retained its restricted comprehension In mod use *lady* is the recognized fem analogue of *gentleman*, and is applied to all women above a loosely-defined and variable, but usually not very elevated standard of social position. Often used (*esp.* in 'this lady') as a more courteous synonym for 'woman', without reference to the status of the person spoken of See also FINE LADY, YOUNG LADY.

As the traditional association of *lady* with *lord* still survives, the former is a title of ostensibly higher dignity than *gentleman* Hence, and not directly as the result of the sentiment of gallantry, the customary order of words in 'ladies and gentlemen'

In the 15–16th c, *The* (or *My*) *Lady* was prefixed to the Christian name of a female member of the royal family, as 'Princess' is now With regard to the use of the prefix in the titles of the nobility of the British Isles, usage has varied greatly at different times, but the following rules are now established (1) In speaking of a marchioness, countess, viscountess, or baroness (whether she be such in her own right, by marriage, or by courtesy), the prefix *Lady* is a less formal substitute for the specific designation of rank, which is not used in conversational address thus 'the Marchioness (of) A' is spoken to, and informally spoken of, as 'Lady A' (2) The daughters of dukes, marquises, and earls have *Lady* (more formally, e g on a superscription, *The Lady*) prefixed to their Christian names (3) The wife of the holder of a courtesy title in which *Lord* is prefixed to a Christian name is known as '(The) Lady John B' (4) The wife of a baronet or other knight ('Sir John C') is commonly spoken of as 'Lady C.', the strictly correct appellation 'Dame Mary C' being confined to legal documents, sepulchral monuments, and the like.

Lag (læg), *sb*[1] and *a* [Belongs to LAG *v*[2]; the origin and mutual relation of the words are obscure.

In some parts of England *fog*, *seg*, *lag*, or *foggie*, *seggie*, *laggie*, are used in children's games as substitutes for 'first, second, last' (see *Eng Dial Dict.* s v *Fog*) This suggests the possibility that *lag* may have originated in the language of sports as an arbitrary distortion of *last*, but even in that case the word may have coalesced with a homophone of independent origin The current hypothesis that the adj is a Welsh *llag* (earlier *llac*), Ir and Gael *lag*, slack, weak, is highly improbable There is some affinity of sense between *lag* and LACK *a* and *v* (cf *to come lag* and *to come lack*), the former might conceivably be an alteration of the latter under the influence of words like FLAG *v*[1], FAG *sb*[1] Cf further MDa *lakke* to go slowly (Kalkar).]

Laik, Sc form of Lack; variant of Lake.

-laik, *suffix*, in the Ormulum written -leȝȝe, in northern and north-midland texts usually -laik, -layk(e, in the Ancren Riwle (MS Nero) and a few other 13th c texts -leic, -lec, -leik; appended in ME. to adjs. to form sbs of quality, none of which have survived into mod. Eng. Etymologically it represents the ON. *-leik-r* str masc. which (with a parallel form *-leike* wk masc.) is the ordinary suffix in ON corresponding functionally to the Eng *-ness*; its use in Eng must have originated in words adopted from Scandinavian, as *godleȝȝe* (Orm) from ON *góðleikr*, but already in the Ormulum (*c* 1200) it is added freely to native English adjs, as in *clenleȝȝe* cleanness, *gredɜleȝȝe* greediness Ormin has in all 28 words of this formation; in some instances he originally wrote *-nesse*, but *-leȝȝe* has been substituted 'in a rudei but apparently contemporary hand' (editorial note in *Orm* II. 349); the reason was perh metrical, as *-leȝȝe* and *-nesse* were in Ormin's prosody equivalent only before a vowel Except in the Ormulum the suffix is somewhat rare, and no instance is known of its being appended to an adj of Romanic origin.

The ON *-leik-r* corresponds in form with the OE suffix *-lāc* (usually neut, rarely masc), now -lock (q v for the etymology), but in function the two are distinct, the ON suffix being appended only to adjs, and the OE suffix only to sbs or verb stems to form sbs expressive of action Occasionally the suffix representing OE *-lāc* was in northern or north midland texts written *-laik*, so that it became coincident in form with the Scandinavian suffix, e g in *dwimerlaik* (Alex), *wodlaik* (R Brunne)

The med L *lamprēda* is usually believed to be an alteration of the synonymous *lampetra* (recorded earlier, viz in the Glossary of Philoxenus, 9 4–5th c), which is explained as f L *lambĕre* to lick + *petra* stone, in allusion to the fact that the lamprey attaches itself by a sucker to stones The use of med L *lamprēda* for the LIMPET as well as the lamprey gives some plausibility to this; but possibly *lampetra* may be merely an etymologizing perversion]

a. Of material objects. Also in phrases like *large of limb* = 'having large limbs'.

Not ordinarily said of persons; the occasional use of expressions like 'a large man' is somewhat playful, the notion being 'taking up a great deal of room' To say 'the larger (='bigger') children' is admissible, if perh somewhat unusual, but the positive (and, indeed, the comparative in the singular) could not be similarly used.

In the earlier examples there may be some notion of the sense 'ample'

Lark (lāk), *v.*[2] *colloq* (orig *slang*) [Belongs to Lark *sb.*[2], the sb and vb. appear first in 1811–3. The origin is somewhat uncertain.

Possibly it may represent the northern Lake *v.*, as heard by sporting men from Yorkshire jockeys or grooms, the sound (lēək, lāək), which is written *lauk* in Robinson's *Whitby Glossary* and in dialect books, would to a southern hearer more naturally suggest 'lark' than 'lake' as its equivalent in educated pronunciation On the other hand, it is quite as likely that the word may have originated in some allusion to Lark *sb.*[1], cf the similar use of *skylark* vb (which, however, is app not recorded till much later)]

2. A commercial denomination of weight, capacity, or quantity, varying for different kinds of goods and in different localities Cf G *last.*

Originally the 'last' must have been the quantity carried at one time by the vehicle (boat, wagon, etc) ordinarily used for the particular kind of merchandise As a weight, it is often stated to be (like the Ger weight of the same name) nominally equivalent either to 2 tons or to 4,000 lbs In wool weight it is 4368 lbs (= 12 sacks). A last of gunpowder is said to be 2,400 lbs. (= 24 barrels), and of feathers or flax 1,700 lbs

The equivalence of the last of wool with 12 sacks seems to have led to an association of the word with the number twelve Thus a last of hides was formerly 12 dozen (also 20 dickers of 10 hides each), of beer 12 barrels, of pitch 12 (sometimes 14) barrels, of cod and herrings 12 barrels (but of red herrings and pilchards 10,000 to 13,200 fish).

As a measure for grain and malt, the last was in the 16th c 12 quarters, but is now 10 quarters = 80 bushels

The ME *laþþe*, from which the modern standard Eng form descends, prob represents an OE **læþþ-*, as this would correspond to the synonymous OHG *lat(t)a*, *ladda* (MHG, mod.G. *latte*); but the mutual relation of the two types is obscure, and the occurrence of a geminated *þ* in OTeut has no known parallel or explanation. Some scholars think that the substitution of *þ* for *t* was due to the influence of the synonymous (and perh. cognate) Welsh *llath* = Irish *slat* —OCeltic **slattā* The Teut. word has passed into the Rom langs. (cf It. *latta*, Sp *lata*, F *latte*); it is usu regarded as cogn w. MHG. *lade* plank (mod G. *laden* counter, shop).]

Lath, obs form of LOATH

Lathe (lēið), *sb*[1] [Late OE *læð* str. neut, corresponding to ON *láð* (poet) landed possession, land:—OTeut. **lēiþo*[m], according to some scholars cogn w -*lēiðī-* in Goth. *un-lēds* poor (? lit. without landed possessions), OE *un-lǽd* (*e* wretched

The form *lathe* (recorded from 14th c) would, if it represented a pronunciation handed down by oral tradition, imply that the OE. word had a short vowel, and connexion with *laðian*, to summon, would then be possible. Probably, however, the word had little oral currency, so that its form may have been influenced by the spelling of early documents The identity of the word with ON *láð* (which involves the conclusion that the OE form was *læð*) is rendered almost certain by the following facts (1) The OE word is in one instance recorded in the sense of the ON. word, viz, in the legal formula 'ne gyrne ic þines ne lǽðes ne landes ne sace ne sócne' (Schmid, *Gesetze der Angelsachsen*, app xi), where it has the same alliterative association as in the frequent ON phrase 'land ok láð'. (2) This alliterative association recurs in our first quotation, where the word has its specific Kentish application (3) Our second quotation implies that 'the lathe of Aylesford' was the territory that was under a jurisdiction attached to the *manor* of Aylesford, so that the development of the special Kentish use from the general sense of 'landed possession' presents no difficulty

The possibility is not excluded that the Kentish term may represent a coalescence of the original OE *læð*, territory, with other words of similar form cf ON. *leið* fem a court or judicial assembly, and OE *-laðe* or *lǽde* in *mótlaðu* pl, attendances at a 'moot' or assembly (? related to ON *líða*, OE *líðan*, to go); also mod Da. *lægd* 'division of a parish for military purposes' (f root of LIE, LAY *vbs*)

The latinized *leadegreves* (see b) may, as is commonly assumed, represent an OE **læðgerēfan* 'lathe-reeves', but the text is of little authority]

Lathe (lēið), *sb.*[3] Also 5, 7 lath. [Of obscure history, prob. cognate with Da. *lad*, in *drejelad* turning-lathe, also in other compounds in which it has the general sense of 'stand, supporting framework', e g *savelad* saw-bench, *sengelad* bedstead, *tøndelad* gantry, *væverlad* loom. The Da. word

is prob a special use of *lad* pile, heap regularly built up —ON. *hlað*, related to *hlaða* to LADE

If the coincidence in form and meaning with Da *lad* be not purely accidental, the Eng word must, notwithstanding its late occurrence, have come down from the time of the Danish settlements in England (A native OE cognate is out of the question, as it would have had *d*, not *ð*.) The Da word, in compounds, is cited by Kalkar from the 15–16th c

As the older form of turning lathe, used as late as the 19th century, was worked by means of a spring lath overhead (see drawing in *Encycl Brit* ed 9, XIV 323), it is not wholly impossible that the word may be a modification of LATH *sb* ; but against this is the occurrence of the word in the wider Danish sense (see sense 1)

The ON *lauð* (in Dicts miswritten *loð*, and explained 'smith's lathe') is commonly given as the etymon, but erroneously All that is known of the word is that it was used in composition to form poetic synonyms for gold]

For *circle*, *parallel of latitude*, see those words

[In their original geographical use *latitude* (L *latitudo*, Gr πλατος) and *longitude* (L *longitudo*, Gr μῆκος) meant quite literally the 'breadth' and 'length' of the oblong map of the known world, this literal sense remained even in the expression 'degrees of latitude and longitude' (μοῖραι πλάτους καὶ μήκους) By a natural development the terms afterwards came (in late Latin, app not yet in Greek) to denote the distance of any place, in the breadthwise and lengthwise direction respectively, from the circle assumed as the origin of measurement]

5. *Astron* The angular distance of a heavenly body from the ecliptic called spec *celestial latitude* (See also Ascending *vbl sb.*, Geocentric *a* 1, Heliocentric *a* 1, Heliographic *a.* 1)

The history of this sense appears to be as follows Orig the word was applied, on the analogy of the geographical use (see 4) to denote the angular distance of a point in the celestial sphere from the equator, measured along a secondary to the latter This, however, was not accurately distinguished by name from the distance of a point from the *ecliptic*, the terms 'latitude' and 'declination' being employed indiscriminately with reference to both these ways of indicating position (Cf quot 1391) In mod use, the terms have been differentiated, *declination* being appropriated to what was originally and with historical propriety called 'latitude', while *latitude* became the name for distance from the ecliptic

*c*1391 Chaucer *Astrol* II § 17 Fro the Equinoxial may the declinacion or the latitude of any body celestial be rikned, after the site north or south, & right so may the latitude or the declinacion of any body celestial, saue only of the sonne be rekned fro the Ecliptic lyne. 1551 Recorde *Cast Knowl* (1556) 176 Properlye they doo call that the Latitude of the Planetes, when they swarue from the Ecliptike line 1594 Blundevil *Exerc* III i xi (1636) 298 The Latitude is counted from the said Ecliptique line towards any of the Poles of the Zodiaque. 1601 Holland *Pliny* I xx Mais in his latitude leaueth the ecliptick line foure halfe degrees 1706 Phillips (ed Kersey) s v, Apparent Latitude, is the Distance of the apparent, or seeming Place of any Planet from the Ecliptick, and True Latitude is the Distance of its real Place from the same Ecliptick 1868 Lockyer *Elem Astron* § 555 269 The right ascension and declination are then easily converted by calculation into celestial longitude and latitude if required

Laurence[2], **Lawrence** (lŏ rĕns) [ad L *Laurentius*] A Christian name, used to denote a personification of indolence *Laurence bids wages* a proverbial phrase meaning that the attractions of idleness are tempting Also *Lazy Laurence*, a reproachful designation for an idle person.

Possibly the alliteration of the last-quoted phrase may sufficiently account for the use of the name; some, however, have suggested an allusion to the heat prevalent about St Laurence's day (Aug 10) Another conjecture is that there was a joke to the effect that when the martyr St Laurence told his tormentors to turn him round on his gridiron, it was because he was too lazy to turn himself It is important to note that the equivalent G *der faule Lenz* (Lenz=Lorenz) has been in use from the 16th c, see Grimm s v *Lenz*

[Two distinct formations appear to have coalesced—(1) OE. had *lafian* to wash by affusion, to pour (water), corresponding formally to MDu., Du. *laven*, OHG *labôn* (MHG, mod G *laben*) to refresh; cf. OHG. *laba*, mod G. *labe* refreshment By some scholars the OE., Du, and Ger words are considered to represent a WGer adoption of L *lavāre* to wash. This view involves some difficulty, as the numerous OHG. examples refer to refreshment by food, drink, or warmth, so that the assumed primary sense 'to wash', if it ever existed, must have been quite forgotten. The L. origin, however, accounts well for the senses of the OE word, which perh. may be only accidentally similar in form to the continental words (2) In ME the representative of the OE vb. blended indistinguishably with the vb. a. F *laver* (= Pr, Sp., Pg. *lavar*, It *lavare*)·—L *lavāre* = Gr. λούειν, f. OAryan root **lou-* to wash (whence Lather).]

Lavender (læ vendəɹ), *sb* [2] and *a* Forms: 3-6 lavendre, 5 lavendere, 6-7 lavander, 6- lavender Also 6 *Sc* lavand. [a AF *lavendre* (OF **lavandre*, whence mod Prov *alebandro*) for **lavendle* —med.L. *lavendula*, also *lavandula*, *lavendula*, *livendola* (10-11th c in Goetz *Corp Gll. Latin* III 629/5), *levendola*, *lavindula*, cf It *lavendola* (Diez; not in Dicts), Sp *lavándula* (in Dicts only as a botanical name), also F *lavande* (cited from Christine de Pisan, 14-15th c), It., Sp. *lavanda* The med L *lavendula* was taken into OHG or early MHG as *lavendla* (in MSS of 12th c.; see *Ahd Glossen* III 105), whence MHG. and early mod.G. *lavendel(e, lobendel, lobengele, laubangel, lavandel, lavander, lafander*, the standard form in Ger, Du, Sw., Da is now *lavendel*

The current hypothesis is that med L *lavendula* is a corrupt form of *lavandula*, a dim of the shorter word which appears in It as *lavanda* (see above) This is commonly identified with It *lavanda* 'washing', the supposition being that the name refers to the use of the plant either for perfuming baths (so already in 16th c. writers) or as laid among freshly washed linen (see 2 below) But on the ground of sense development this does not seem plausible, a word literally meaning 'washing' would hardly without change of form come to denote a non-essential adjunct to washing. Besides, the earliest form appears to be *livendula*; if this could be connected with L *livēre* to be livid or bluish, the sense would be appropriate, but the formation is obscure; M Paul Meyer suggests, as a possibility, that the original form may have been **livendula* for **lividula*, f *lividus* LIVID (A med L word of about the same date and of app similar form is *calendula* marigold) It is not certain that the word has not changed its application, as in early glosses *livendula, lavendula*, are given as synonymous with *sambucus* and *amaracus*, which properly mean 'marjoram', but plant-names were applied often very loosely The It *lavanda*, F. *lavande*, would seem to be a back-formation from med.L. *lavandula*]

III Scientific and philosophical uses.

17 In the sciences of observation, a theoretical principle deduced from particular facts, applicable to a defined group or class of phenomena, and expressible by the statement that a particular phenomenon always occurs if certain conditions be present In the physical sciences, and occasionally in others, called more explicitly *law of nature* or *natural law*

The 'laws of nature', by those who first used the term in this sense, were viewed as commands imposed by the Deity upon matter, and even writers who do not accept this view often speak of them as 'obeyed' by the phenomena, or as agents by which the phenomena are produced

b With reference to a particular science or field of inquiry

Laws of motion · chiefly used *spec* for the three following propositions formulated by Newton (1) A body must continue in its state of rest or of uniform motion in a straight line, unless acted on by some external force, (2) Change of motion takes place in the direction of the impressed force, and is proportional to it, (3) Action and reaction are equal, and in contrary directions

c In certain sciences, particular 'laws' are known by the names of their discoverers, as in the following examples (Most of these terms are of general European currency, their equivalents being used in Fr, Ger, It, etc)

(*a*) *Astronomy.*

Bode's law, an empirical formula representing the distances of the orbits of the other planets from the orbit of Mercury as forming an approximate geometrical progression **Kepler's laws**, the three propositions established by John Kepler (1571-1630) with regard to the planetary motions. (1) That the planets move in ellipses, the sun being

in one of the foci; (2) That the radius vector of a planet describes equal areas in equal times, (3) That the square of the periodic time of a planet is directly proportional to the cube of its mean distance from the sun

1781 *Chambers' Cycl., Kepler's Law*, is that law of the planetary motions discovered by Kepler 1805 *Edin Rev* Jan 443 Kepler's Laws 1833 HERSCHEL *Astron.* Index, Bode's law of planetary distances 1837 WHEWELL *Induct Sci* I 416 One of the important rules known to us as 'Kepler's laws'.

(*b*) *Physics*

Avogadro's law, the law that equal volumes of different gases, pressure and temperature being equal, contain the same number of molecules **Boyle's law**, the principle, published by Robert Boyle about 1662, that the volume of a given mass of gas (the temperature being constant) varies inversely as the pressure **Charles's law**, the law discovered by Alex. César Charles (1746–1823) that for every degree centigrade of rise in temperature, the volume of a gas increases by ·00366 of its amount at zero. **Dulong and Petit's law**, the law that all the chemical elements have approximately the same atomic heat.

1860 MAXWELL *Sci. Papers* (1890) I 389 Boyle and Mariotte's law 1863 ATKINSON *Ganot's Physics* 110 The laws of the compressibility of gases were studied separately by Boyle and by Mariotti . Each of these philosophers arrived at the same law, which in England bears the name of Boyle's, and on the continent of Mariotti's *Ibid* 288 Dulong and Petit's law may be thus expressed; the same quantity of heat is needed to heat an atom of all simple bodies to the same extent 1880 CLEMINSHAW tr. *Wurtz' Atomic Theory* v 95 The 'law', as it is generally called, of Avogadro and Ampère may be enunciated as follows: Equal volumes of gases or vapours contain the same number of molecules 1884 DANIELL *Princ Physics* 223 Then the volume varies as the 'absolute temperature' (Charles's Law, often attributed to Gay Lussac).

(*c*) *Philology.*

Grimm's law, the rule formulated by Jacob Grimm (in the 2nd ed of his *Deutsche Grammatik*, 1822) with regard to the representation in the Germanic langs of certain consonants of the primitive Aryan language Grimm's statement was that original aspirates became mediæ in Gothic, Low German, English, Old Norse, etc. and tenues in High German, original mediæ became tenues in Gothic, etc, and 'aspirates' (supposed to be represented by spirants and affricates) in High German; and original tenues became 'aspirates' in Gothic, etc. and mediæ in High German. The formula is no longer accepted as correct, but the name of 'Grimm's law' is still applied to its rectified form, which is too complicated to be stated here. **Verner's law**, discovered by Karl Verner of Copenhagen in 1875, deals with a class of exceptions to Grimm's law, and is to the effect that an original Germanic voiceless spirant, when following or terminating a primitively unaccented syllable, became a voiced spirant, which in the historic Germanic langs is under certain conditions represented by a media, the *s* which according to the 'law' results from *s* is, except in Gothic, normally represented by *r*. **Grassmann's law**, published by Hermann Grassmann in 1863, is that when primitive Aryan had two aspirates in the same or successive syllables the former of them was in Sanskrit changed into the corresponding media, and in Greek into the corresponding tenuis

Gresham's law, the principle, involved in Sir Thomas Gresham's letter to Q Elizabeth in 1558, that 'bad money drives out good', i e that when debased money (sc. coins reduced in weight or fineness, or both) is current in the same country with coins of full legal weight and fineness, the latter will tend to be exported, leaving the inferior money as the only circulating medium.

1858 MACLEOD *Elem Pol. Econ.* 477 As he was the first to perceive that a bad and debased currency is the cause of the disappearance of the good money, we are only doing what is just, in calling this great fundamental law of the currency by his name. We may call it Gresham's law of the currency.
